

## **What is a Transit Center?**

Transit centers are destination points that serve as hubs for riders. These hubs are essentially giant bus stops that have space for buses and people from several routes. You'll also see amenities like ticket vending machines, covered waiting areas, space for your Uber pick-ups, and bicycle storage.

## **When will the project be finished?**

This project is slated to be completed early 2022.

## **Is this just for high school students?**

While this project is being completed at the same time as the school's ongoing renovations, this transit center is for any WeGo rider.

## **How many people use this stop in a day?**

This stop sees more than 300 boardings a day. We expect this number to increase as more routes connect to this location.

## **What routes will connect to the Hillsboro Transit Center?**

This area is currently served by 7 Hillsboro Pike with future expansions of nearby routes, including 17 12<sup>th</sup> Avenue South.

## **Why is there space for bike storage?**

Bicycle storage is a part of our Transit Design Guidelines because many of our riders rely on bikes for different part of their commutes, even if Hillsboro Pike doesn't have dedicated lanes.

## **Will there be areas for parking?**

While a parking area is not included in our building plans, there are areas for automobile pick-up and drop-off. This means space for your Uber, Lyft, or your uncle who's taking you to the stop while your car is in the shop. However, our pick-up/drop-off area should not be used to access Hillsboro High School.

Pick-up/Drop-off space is for WeGo riders only. A separate pick-up/drop-off space is available for those going to the high school.

## **How much bigger will this new space be?**

The current shelter at Hillsboro High School uses 50 square feet of space. The new transit center will provide 1,000 square feet of covered space once finished.

**How were site plans designed?**

Site designs were built using notes from public feedback and adopted policies from our [Transit Design Guidelines](#).

**Will there be security on-site?**

Yes, security will open, close, and perform regular patrols through the space. Cameras will be installed and monitor the facility 24/7.

**Will it be cleaned regularly?**

Yes, our facilities cleaning team will provide full-time staffing designed for proper treatment and maintenance.
